Digital Systems Gap Analysis

Client

CoGen UK

Location

England

Contract Value

Various

Awarded

Ongoing

Overview

To review existing plant documentation and support the implementation of integrated management systems at various sites.

- 📌 Repeat Custom
- 📌 Onsite & Remote Working
- 📌 Independent Analysis

Project Team

- 📌 Martin Gorevan
- 📌 Andrew Jenkins
- 📌 Lucy Searle

Project

CoGen UK are the leading developers and operators of Advanced Thermal Gasification plants in the UK. Often CoGen take on underperforming plants and retrofit them with proven gasification technology.

Zebec were engaged by CoGen to complete the documentation for several plants and to help them apply document control in their own business. These assignments have been very challenging where incomplete or superseded documents required investigation and creation of new documents. Zebec conducted a Gap Analysis considering Operations and Maintenance, Health & Safety and Environmental Management, followed by the production of a set of working documents for the site filed on a digital IT system such as Sharepoint, Teamwork or M-Files.

Most recently, Zebec have been working closely with CoGen to implement their in-house cloud-based filing system to enable efficient project development and operations, and to support their aim of achieving ISO accreditation.

Key Skills

- 📌 Project Management
- 📌 ISO Accreditation
- 📌 IT Systems
- 📌 Client Reporting
- 📌 Training
- 📌 Plant Documentation

“Zebec have supported CoGen UK on a number of projects, providing an invaluable source of knowledge, experience and competency across a range of subjects.”
